

## 100MW battery energy storage

#### **Overview**

What is a 100MW battery energy storage project?

It is the first 100MW large-scale electrochemical energy storage national demonstration project approved by the National Energy Administration. It adopts the all-vanadium liquid flow battery energy storage technology independently developed by the Dalian Institute of Chemical Physics.

Will totalenergies invest in a 100 mw/200 MWh battery storage project?

Download the Press Release (PDF) Paris, July 24, 2024 – TotalEnergies has taken the final investment decision for a 100 MW /200 MWh battery storage project in Dahlem, North Rhine-Westphalia.

How many kWh will a power station store?

The project is expected to complete the grid-connected commissioning in June this year. After the completion of the power station, the output power will reach 100 megawatts, and the energy storage capacity will reach 400 MWh, which is equivalent to storing 400,000 kWh of electricity.

Is battery storage balancing the grid?

Given the intermittent nature of renewable energy sources, battery storage is crucial in balancing the grid. A study by Frontier Economics projects that energy storage assets will generate €12 billion in macro-economic value by 2050, reduce CO2 emissions by up to 6.2 million tonnes in 2030, and lower electricity costs for end customers.

Will MW storage build a lithium-ion battery storage power plant in Arzberg?

MW Storage, acting as the project developer and participant through its fund, will oversee the construction of a lithium-ion battery storage power plant in Arzberg.

What is the Dalian battery energy storage project?

It adopts the all-vanadium liquid flow battery energy storage technology independently developed by the Dalian Institute of Chemical Physics. The project is expected to complete the grid-connected commissioning in June this year.
