

1kw inverter capacity

Overview

Before we go any further, we highly recommend that you choose a pure sine wave inverter. This type of inverter delivers high-quality electricity, similar to your utility company. This way, none of your appliances run the risk of being damaged. Now, when it comes to sizing your inverter, you always need to check.

We have summarized the appliances that inverters from 300W to 3000W can run depending on their rated maximum power. Note to our readers: Use the above formulato determine.

The size of the inverter will be determined by the watts of your solar panels. A general rule of thumb is that you will need a 1,000 watt (1kW) inverter for every 1 kilowatt (kW) worth of solar panels. So, if you have 4 kW of solar panels, you would need at least a 4kW inverter.
