

# 28-cell battery cabinet installation cost

#### **Overview**

Are battery energy storage systems worth the cost?

Battery Energy Storage Systems (BESS) are becoming essential in the shift towards renewable energy, providing solutions for grid stability, energy management, and power quality. However, understanding the costs associated with BESS is critical for anyone considering this technology, whether for a home, business, or utility scale.

How many batteries can be installed in a Generac cabinet?

Six batteries maximum can be installed in each cabinet, up to a total of 36 kWh between two battery cabinets. Batteries are easy to slide in and out and can be done by the owner. Generac offers a 10-year warranty on the batteries, cabinets and inverters, including labor.

How much does it cost to install solar panels?

Adding 22 solar panels, including installation, costs \$29,000. Solar panels and the Generac PWRcell system combined cost about \$47,000. The price also depends on how many batteries you add, at a cost of around \$2,000 per battery. It's important to remember that for every six batteries you add, you must purchase one more cabinet.

Why is a Bess battery so expensive?

The battery is the heart of any BESS. The type of battery—whether lithium-ion, lead-acid, or flow batteries—significantly impacts the overall cost. Lithium-ion batteries are the most popular due to their high energy density, efficiency, and long life cycle. However, they are also more expensive than other types.
