

5g base station point to point

Overview

The 5G RAN architecture is composed of multiple nodes and components that work together to provide seamless connectivity to users. These nodes include the User Equipment (UE), the Base Station (BS).

5g base station point to point

5G RAN Architecture: Nodes And Components

Discover 5G RAN and vRAN architecture, its nodes & components, and how they work together to revolutionize high-speed, low-latency wireless communication.
