

800V battery inverter

Overview

How does a Valeo 800V sic inverter work?

It converts Direct Current (DC) from the battery to Alternative Current (AC) to power the electric Motor. It can also be used in reverse mode to charge the battery by transforming kinetic energy from the vehicle into electrical energy that can be stored in the battery. What are Valeo 800V SiC inverter benefits?

.

What is a high voltage inverter?

The inverter is the brain at the heart of the powertrain, it controls the electric motor. It converts Direct Current (DC) from the battery to Alternative Current (AC) to power the electric Motor.

What is 800V EV charging?

Today, 800V architectures are already in production in the latest EVs and they are what make ultra-rapid charging possible. By doubling the voltage from the previous 400V, electrical power is increased but the current (amps) stays the same.

What is a high voltage traction inverter?

High-voltage traction inverter The high-voltage inverter converts direct current (DC) from the batteries or generator to alternating current (AC) to power the traction drive motors.

What is the 800-volt silicon carbide inverter for electric vehicles?

The 800-Volt Silicon Carbide Inverter for Electrified Vehicles, with its breakthrough features, is a game-changer for the industry that manufacturers can use to create the compelling buying propositions that lead to greater acceptance and therefore sales for these new means of mobility.

How much power does a Wolfspeed EV traction inverter use?

To complete the system the 1200 V six-pack YM SiC power modules from Wolfspeed has been associated. This EV traction inverter reference design has been tested jointly with Hardware in the loop (HIL) setup at Wolfspeed Munich Laboratory. Under an 800-volt battery condition a performance of over 300 kilowatts at peak power has been reached.

800V battery inverter

The new breed of 800 volt inverters for EVs

But one of the most important bits in an EV's drivetrain, the inverter, is often overlooked. McLaren Applied Technology, Nio, Equipmake and BorgWarner have all recently ...
