

## Algeria Telecommunication Photovoltaic Base Station Foundation Project

#### **Overview**

What is Algeria's first photovoltaic project?

Among them, the 233-megawatt photovoltaic project completed in 2016 was Algeria's first new energy project and also the first large-scale grid-connected photovoltaic power station project in Africa. It was honored with the Luban Prize for Overseas Projects in 2018-2019.

How many megawatts a photovoltaic system will be built in Algeria?

The two photovoltaic projects have a capacity of 220 megawatts and 150 megawatts, respectively, and will be constructed by POWERCHINA using an EPC model. The two projects are parts of the 15 gigawatts photovoltaic network planned and constructed for Algeria by 2035.

What is a photovoltaic-diesel hybrid system for mobile phone base station?

This work concerns the techno-economic study of photovoltaic-diesel hybrid system for mobile phone base station located in Oum el Bouaghi city (in southern Algeria). This system is made up mainly of a photovoltaic panel, a diesel generator, power converter and lead-acid battery.

How much sunlight does a mobile phone base station receive a year?

It is estimated at more than 3000 h of sunshine per year and 5 kWh of daily energy received on a horizontal surface of 1 m 2 over most of the country. This work concerns the techno-economic study of photovoltaic-diesel hybrid system for mobile phone base station located in Oum el Bouaghi city (in southern Algeria).
