

# **Assembly of 12kW AC inverter**

#### **Overview**

How do I choose a home power inverter?

Before installing a home power inverter, it's vital to evaluate your energy needs. Start by calculating the average energy consumption of your household appliances. For homes that mainly use basic appliances like refrigerators, computers, and TVs, a small power inverter in the range of 3-5kW is typically sufficient.

How do I connect an inverter to my home electrical system?

To integrate the inverter with your home electrical system: Turn Off the Main Power Supply: Ensure safety by cutting off the main power supply before making any connections. Connect to the AC Distribution Box: Use appropriate cables to connect the inverter to the home's AC distribution box, following the wiring diagram.

Why do you need a home power inverter?

Home power inverters play a crucial role in modern energy systems, converting DC power from solar panels into AC power for home use. Proper installation of your home power inverter is essential to ensure safety, efficiency, and longevity of the system.

How do you install a power inverter?

Screwdriver: Fasten the screws of the inverter and related components. Electric drill and hammer: Drill holes for securing inverters and mounting racks. Cable stripper: Strip the outer skin of the cable to expose the wire for connection. Cable twister: Cut and twist cable ends to ensure stable connections.

What size solar inverter do I Need?

For homes that mainly use basic appliances like refrigerators, computers, and TVs, a small power inverter in the range of 3-5kW is typically sufficient.

Choosing the right size for your solar inverter for home ensures that you have enough power to meet your daily energy requirements without overloading the system.

Which breaker connects the inverter to the main panel?

The inverter ground is connnected to the main panel ground. This breaker supplies util power to the inverter always. It has to be a seperate breaker (not in the main panel). The AC out L1/L2 of the inverter is connected to the transfer switch (solar input). The N is directly connected to the main panel nuetral.
