

## Australia s photovoltaic energy storage requirements

#### **Overview**

What are the regulations for residential solar installations in Australia?

Regulations for residential solar installations in Australia are governed by stringent compliance requirements that include adherence to AS/NZS 5033 safety standards and guidelines from the Clean Energy Council.

What are the requirements for installing a solar system in Australia?

Every installation carried out by an accredited installer is required to meet the following Australian Standards: Clean Energy Council Guidelines must also be followed. Installers are required to install the system in accordance with the Clean Energy Council's Installation Guidelines for Accredited Installers and Supervisors.

What is a standard for a photovoltaic array?

The recently published standard is AS/NZS 5033:2021, Installation and safety requirements for photovoltaic (PV) arrays. Clean Energy Regulator, Postcode data for small-scale installations | Accessed: 29 September 2021.

Do Solar Homes installers have to comply with Australian standards?

Solar Homes installers must adhere to current and relevant standards for the design and installation of solar and battery storage systems. These are made mandatory through: Penalties for failing to meet Australian Standards vary. We may suspend or cancel an installer or retailer from its programs for non-compliance.

How many solar panels are installed in Australia?

In two decades, almost four million solar PV panel systems have been installed across Australia, which has seen a dramatic reduction in overall costs. Standards Australia has published a revision to AS/NZS 5033:2021, Installation and safety requirements for photovoltaic (PV) arrays.

Why do Australian solar panels need international standards?

"Solar is booming worldwide, so it's important we align with international standards so that the Australian market can use international products and technologies as well," said Mr Atkins. The recently published standard is AS/NZS 5033:2021, Installation and safety requirements for photovoltaic (PV) arrays.
