

Bahamas Portable Energy Storage Power Plant

Overview

This ambitious project is set to significantly reduce electricity costs and cut emissions by 25%, with the solar plant expected to be operational by 2025. This development is a vital part of The Bahamas' ongoing efforts to diversify its energy sources and reduce reliance on imported fossil fuels. How does a comprehensive energy policy work in the Bahamas?

Our comprehensive energy policies work together to modernize our system and bring electricity prices down in The Bahamas. 70MW of solar power and 35MW of Battery Energy Storage Systems will be integrated into the existing grid.

Will the Bahamas build utility-scale solar power?

For the first time, The Bahamas is on the path to building utility-scale solar power across our islands. Large photovoltaic (PV) solar arrays will capture the energy from the sun and send it to our country's electricity grid. What steps are required as The Bahamas moves forward with utility-scale solar power, and what are the costs?

.

How will a new energy system affect the Bahamas?

Comprehensive upgrades to our country's transmission and distribution infrastructure, and switching from heavy and diesel fuels to solar power and natural gas, will create new efficiencies and reduce the price of electricity in The Bahamas. But it won't happen overnight – it will take time to upgrade our grid and to integrate cleaner energy.

How does solar power work in the Bahamas?

Large photovoltaic (PV) solar arrays will capture the energy from the sun and send it to our country's electricity grid. What steps are required as The Bahamas moves forward with utility-scale solar power, and what are the costs?

Island-by-island planning. Every one of our inhabited islands is different, and requires a unique set of solutions.

What is the new energy era in the Bahamas?

It's a New Energy Era in The Bahamas. our electricity sector requires comprehensive reform. Lowering prices, and ensuring fair prices, for Bahamian homes and businesses. Increasing the reliability of our electricity supply. Increasing hurricane resilience during this new climate era.

How will Wärtsilä's gems Digital Energy Platform help the Bahamas?

The combination of flexible power generation and energy storage utilising Wärtsilä's unique GEMS Digital Energy Platform will support the Government of the Bahamas' plans to increase its share of renewable sources, notably solar, by 30 percent by 2030. Renewables hold the key to decarbonising the energy sector.
