

# Bangladesh Independent Energy Storage Power Station

#### **Overview**

According to the request for proposals issued on July 30, the program calls for 16 standalone projects, each rated at 10MW/40MWh, totaling 160MW/640MWh of four-hour storage capacity. Selected developers will design, build, own, and operate the systems under 15-year agreements. Is energy storage regulated in Bangladesh?

For example, the Bangladesh Energy Regulatory Commis-sion (BERC) Licensing Regu-lations 2006 do not include rules for licensing of energy storage technologies (except for pumped storage). The institutional framework for the procurement and deploy-ment of such projects is well established in the country.

What can be done about grid connected energy storage in Bangla-Desh?

Limited experience and knowledge of grid connected energy storage in Bangladesh. Early-stage pilot programmes such as the planned 2MW grid connected BESS funded by the Asian Development Bank (ADB) would further support capacity building and knowledge transfer. 3.3.

How much energy storage does Bangla-Desh need?

120GW of RE generation. If a similar ra-tio were to be considered for Bangladesh's short-term RE aspirations (~1GW in the next three years), the resulting energy storage requirements would amount to 250MW/ 500MWh of energy storage.

Who is deploying EV charging stations in Bangladesh?

Various power sector agencies including Bangladesh Rural Electrification Board (BREB) and West Zone Power Distribution Company Limited (WZPDCL) have already deployed EV charging stations, as have various private investors (including SolShare).

How does the power sector support transport in Bangla-Desh?

The power sector continues to support the ongoing electrifica-tion of transport in Bangla-desh, through various initia-tives undertaken by distribu-tion companies and the roll-out of an EV charging tariff.

Can distribution companies provide electricity solutions for displaced communities in Bangladesh?

There are no service obliga-tions for distribution compa-nies to provide electricity solu-tions for displaced communi-ties in Bangladesh. Distribution companies and non-governmental organisations (NGOs) (in the absence of service area obligations) would be key institutional stakeholders for the deployment of this applica-tion.
