

Bangladesh energy storage project subsidies

Overview

Why are energy subsidies important in Bangladesh?

In Bangladesh, the rationale for energy subsidies rests mainly on the argument that they help keep energy affordable, especially for low-income groups, and thereby play an important role in promoting equity and social development. Energy subsidies contribute to raising household incomes, both directly and indirectly.

Should Bangladesh support energy access for the poor?

While there is a clear need to support energy access for the poor in Bangladesh, current fuel and electricity subsidies are an expensive and ineffective means for doing so. The government is spending more than 4 per cent of GDP on energy subsidies—more than it spends on health and social welfare programs.

Can energy storage be used in Bangladesh?

Concluded in May 2023, the assignment assessed available energy storage technologies, evaluated the role of energy storage in the current grid conditions, identified potential storage locations, analysed energy storage requirements under variable renewable energy (VRE) integration, and developed a roadmap for energy storage in Bangladesh.

Does the EU support green energy transition in Bangladesh?

The EU engagement and financial commitment in support to the green transition in Bangladesh covers different aspects of the power sector. This year, the EU has designed a comprehensive financing package of EU grant support towards Bangladesh Green Energy Transition.

Does removing subsidies affect economic outcomes in Bangladesh?

Simulating, using a CGE model, the economic consequences of removing direct subsidies to electricity and indirect subsidies to natural gas

consumption in Bangladesh, we find that the removal of both types of subsidies causes positive economic outcomes.

Can distribution companies provide electricity solutions for displaced communities in Bangladesh?

There are no service obliga-tions for distribution compa-nies to provide electricity solu-tions for displaced communi-ties in Bangladesh. Distribution companies and non-governmental organisations (NGOs) (in the absence of service area obligations) would be key institutional stakeholders for the deployment of this applica-tion.
