

# **Base Station Power Energy Saving Company**

#### **Overview**

Why should you choose base power?

Base offers fair, fixed rates and reliable backup power. Since revenue comes from the grid, not customers, Base avoids hidden fees and surprise rate hikes. Your agreement also legally guarantees your rates stay below the market average.

Is base a good backup battery solution?

Base offers a significantly less expensive backup battery solution compared to alternatives due to the unique shared business model: Base earns income from the power grid instead of homeowners. This business model allows you to get energy backup without paying tens of thousands of dollars for a traditional generator.

Can a base battery power a home if there's a power outage?

As a result, battery charge levels fluctuate and batteries may power your home to support the grid - even when there's no outage. Base members get the full benefit of whole home backup protection from the Base battery. Get reliable backup power during outages without spending tens of thousands on a generator or comparable battery.

Why should you choose a base Solar System?

An expensive solar system and solar battery also requires a massive upfront investment which often can take longer than the lifespan of the system to pay back. With Base, you pay just a one-time installation cost that pays the team of electricians to install the battery on your home. Base offers fair, fixed rates and reliable backup power.

Why should you switch to base?

Base provides affordable energy with automatic backup power—no solar required and switching costs covered. Join over 2,000 Texans who switched to

Base to stay powered and save money. Low electricity rates with affordable whole-home backup.

#### **Base Station Power Energy Saving Company**

#### <u>Communication Base Station Energy</u> Solutions

Due to harsh climate conditions and the absence of on-site personnel to maintain fuel generators, the company required a reliable solution to ensure the base station's stable operation and ...
