

Base station 48v lithium iron phosphate battery power supply

Overview

What is a 48 volt lithium iron phosphate battery?

A 48 Volt 160 Ah lithium iron phosphate (LiFePO4) deep cycle battery is packed with power, delivering efficient power for battery systems requiring large amounts of power at 48 Volt. The BSLBATT Battery 48V 160 Ah has a large amp capacity in one battery and eliminates the need for multiple batteries without losing amperage.

What is a 48V 100Ah LiFePO4 battery pack?

Our 48V 100Ah LiFePO4 battery pack, designed specifically for telecom base stations, offers the following features: High Safety: Built with premium cells and an advanced BMS for stable and secure operation. Long Lifespan: Over 2,000 cycles, significantly reducing replacement and maintenance costs.

Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO4) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

What makes a telecom battery pack compatible with a base station?

Compatibility and Installation Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. Modular Design: A modular structure simplifies installation, maintenance, and scalability.

How long does a LiFePO4 battery last?

This is crucial for telecom base stations that require continuous operation. Long Cycle Life LiFePO4 batteries can achieve over 2,000 cycles, and in some cases up to 5,000 cycles, far surpassing the 300–500 cycles of lead-acid batteries. This translates to lower replacement frequency and maintenance costs.

What is a wide temperature range LiFePO4 battery?

This translates to lower replacement frequency and maintenance costs. Wide Temperature Range LiFePO4 batteries operate reliably in temperatures ranging from -20°C to 60°C, making them suitable for the diverse and often extreme environments of telecom base stations.

Base station 48v lithium iron phosphate battery power supply

Reliable 48v lithium iron phosphate battery pack 100Ah for telecom base

A 'drop in' replacement for lead acid batteries. Higher Power: Delivers twice power of lead acid battery, even high discharge rate, while maintaining high energy capacity.
