

Base station power supply low voltage protection

Overview

LLVD is a power management mechanism that automatically disconnects the load (i.e., base station equipment) when the power system detects that the output voltage falls below a set threshold, protecting the load equipment from damage caused by low voltage.

Base station power supply low voltage protection

LLVD & BLVD in Base Station Power Cabinets

LLVD is a power management mechanism that automatically disconnects the load (i.e., base station equipment) when the power system detects that the output voltage falls below a set ...
