

# **Battery Energy Storage Container Support Policy**

### **Overview**

What is a containerized battery energy storage system?

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required. This setup offers a modular and scalable solution to energy storage.

What is a battery energy storage system?

A battery energy storage system (BESS) is an electrochemical device that charges (or collects energy) from the grid or a power plant and then discharges that energy at a later time to provide electricity or other grid services when needed.

What is the battery energy storage system guidebook?

A public benefit corporation, NYSERDA has been advancing energy solutions and working to protect the environment since 1975. The Battery Energy Storage System Guidebook contains information, tools, and step-by-step instructions to support local governments managing battery energy storage system development in their communities.

Why do system planners need to plan a battery storage system?

As regulators provide more incentives for the viability of battery storage to provide capacity and energy, system planners must adequately plan the system for a projected large increase in BESS, understanding the impact of size, location, and operating characteristics on maintaining the reliable operation of the grid.

What is a battery energy storage system (BESS)?

The amount of renewable energy capacity added to energy systems around the world grew by 50% in 2023, reaching almost 510 gigawatts. In this rapidly evolving landscape, Battery Energy Storage Systems (BESS) have emerged as

a pivotal technology, offering a reliable solution for storing energy and ensuring its availability when needed.

What equipment is needed for a battery energy storage system?

hnologyProposed Battery Energy Storage System EquipmentThe proposed equipment for the BESS is Samsung SDI E5 Lithium-ion battery stored in CEN 20' ISO co tainers. The storage capacity is 48 MW, 4-hour duration. The system is currently undergoing fi
