

# **Battery Energy Storage in Southern Europe**

#### **Overview**

Are battery energy storage systems a breakthrough year in Europe?

It was the third year in a row that the European BESS 2023 was a breakthrough year for battery energy storage systems (BESS) in Europe, as the recognition of their critical role for a secure and cost-efficient clean energy transition keeps improving. Batteries have entered a new phase, as the exponential growth curve starts to verticalise.

What is the battery storage Europe platform?

"The Battery Storage Europe Platform represents a vital opportunity to help shape smarter regulation and advocate for a policy framework that truly supports investment in storage. If we are to scale at the pace the energy transition demands, platforms like this must lead the way." Managing Director, Renewable Energy Insurance Broker (REIB).

Which country has the largest battery storage market in Europe?

Germany, Italy and the United Kingdom continue to lead the European battery storage market in 2025 and together account for almost 70 percent of newly installed annual capacity. Germany holds the largest market share with 27 percent, followed by Italy with 17 percent and the UK with 11 percent.

Why are battery storage markets growing in Europe?

Battery storage markets in Europe have developed significantly, especially over the past three years, driven by the need for renewable energy integration, technological advancements, supportive policies, and substantial investments.

Is Europe embracing battery storage?

Our new report shows that the market is increasingly embracing the battery storage option. In 2023, Europe's newly installed storage capacity grew by 94% to 17.2 GWh to reach a total installed capacity of 35.9 GWh in 2023, after

doubling in 2021 and 2022.

What is the European market outlook for battery storage 2024-2028?

Welcome to the European Market Outlook for Battery Storage 2024-2028. Solar and its renewable peers have proven their pivotal role for the well-being of Europe in recent years, as they have backed the continent's energy security, helping to manoeuvre through an unprecedented energy crisis.

#### **Battery Energy Storage in Southern Europe**

### Connected Energy launches French expansion with major ...

Connected Energy has secured grid connection for one of Europe's largest second-life battery energy storage deployments, marking the UK company's expansion into the French ...

WhatsApp Chat

#### **Energy storage**

The main energy storage method in the EU is by far 'pumped hydro' storage, but battery storage projects are rising. A variety of new technologies to store energy are also ...
