

Battery cells used in Australian outdoor power supplies

Overview

Who uses batteries in Australia?

They are used by all sectors of the Australian economy including agriculture, mining, transport, services, and manufacturing. Batteries provide flexible, convenient, and reliable energy supplies for portable, remote, and emergency uses.

Where can I buy lithium batteries for energy storage?

Lithium batteries for energy storage EV Works is the Australian distributor for Winston cells and batteries. We now stock larger format cells up to 1000Ah for solar energy storage for industrial, domestic and outdoor adventure use. Battery packs can be made up to any required voltage and housed in steel boxes for safety.

Do lithium batteries contain all new cells?

Lithium batteries sold in the Australian market may not contain all brand new cells. Examples are emerging of batteries which contain a mix of new and second life battery cells even in brand new batteries. Ask the product manufacturer or distributor whether the battery contains only new cells or a mix of new and second life.

What are batteries used for?

Batteries provide flexible, convenient, and reliable energy supplies for portable, remote, and emergency uses. Batteries are often characterised by their chemistry or the chemical mixture that it is the driver of the reaction to create energy. The main commercial types sold by ABIA members are:.

Are lithium batteries a good option for solar energy storage?

Energy storage using lithium batteries is fast becoming the preferred option over grid storage for solar energy. This is primarily due to the reduced feed in tariff paid by energy supply companies. Lithium batteries are actually cheaper

than the equivalent in lead acid batteries.

Where can I find a list of approved batteries?

Search the Clean Energy Council's list of currently approved batteries. This list contains over 750 lithium-based batteries that meet industry best practice requirements as described in the Battery Safety Guide including international battery safety standards and additional requirements for safety and consumer protection.
