

## Battery energy storage systems in Austria

#### **Overview**

Austria is a "small but beautiful" energy storage market, with residential and commercial storage systems dominating the sector. In 2024, residential storage capacity reached 560 MWh, accounting for 70% of the total, while commercial storage capacity stood at 190 MWh, making up 24%. What is the largest battery storage facility in Europe?

Last year, a deal was struck for the largest battery storage facility in Europe to be built in Scotland. The Scottish Green Battery Complex will consist of two 400 MW battery facilities, both providing 800 MWhrs of energy storage capacity, and is expected to become operational by 2024.

How much does a photovoltaic battery storage system cost in Austria?

The total inventory of photovoltaic battery storage systems in Austria therefore rose to 11,908 storage systems with a cumulative usable storage capacity of approx. 121 MWh. For 2020, a price of around € 914 per kWh of usable storage capacity excl. VAT was charged for PV storage systems installed as turnkey solutions.

Does Austria have a market for energy storage technologies?

A study 1 carried out by the University of Applied Sciences Technikum Wien, AEE INTEC, BEST and ENFOS presents the market development of energy storage technologies in Austria for the first time.

Where are battery energy storage systems being installed in Australia?

We've awarded Hybrid Systems Australia the contract to supply and install Battery Energy Storage Systems (BESS) in Carnarvon, Marble Bar, Wiluna, Yalgoo and Yungngora. The systems will be deployed across 2021 and will allow customers to install rooftop solar systems on their homes once commissioned.

How many tank water storage systems are there in Austria?

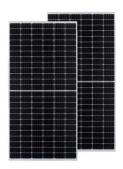

A total of 840 tank water storage systems in primary and secondary networks with a total storage volume of 191,150 m³ were surveyed in Austria. The five largest individual tank water storage systems have volumes of 50,000 m³ (Theiss), 34,500 m³ (Linz), 30,000 m³ (Salzburg), 20,000 m³ (Timelkam) and twice 5,500 m³ (Vienna).

How big is Austria's hydraulic storage power plant capacity?

In 2020, Austria had a hystorically grown inventory of hydraulic storage power plants with a gross maximum capacity of 8.8 GW and gross electricity generation of 14.7 TWh. This storage capacity has already played a central role in the past in optimising power plant deployment and grid regulation.
