

Belgian Communications shuts down 5G base stations for power outages

Overview

Why has Belgium slowed down its 5G deployment?

Several regulatory and market challenges might have slowed down its 5G deployment: Delayed 5G Auction: Belgium was among the last countries in Western Europe to allocate 5G spectrum, creating a competitive disadvantage for Brussels in network expansion.

Does Brussels have the weakest 5G experience in Europe?

MedUX's broader European analysis, set to be published in February, suggests that Brussels has one of the weakest 5G experiences in Europe. The EU aims for uninterrupted 5G coverage in all urban areas by 2025, but Brussels is far from meeting this target.

Will 5G be available in Brussels by 2025?

The EU aims for uninterrupted 5G coverage in all urban areas by 2025, but Brussels is far from meeting this target. The report highlights that high-quality 5G, defined by mid-band spectrum deployment, is significantly behind schedule, with Stand-Alone (SA) 5G deployments lagging even further.

Why does Brussels lag behind other European cities in 5G quality?

Despite being the political heart of Europe, Brussels lags behind other major European cities in 5G quality. Several regulatory and market challenges might have slowed down its 5G deployment:.

Should Brussels accelerate its 5G deployment strategy?

With the EU Digital Decade 2025 targets aiming for uninterrupted 5G coverage across all urban areas and major transport routes, Brussels must accelerate its 5G deployment strategy to avoid lagging behind European leaders.

Does Belgium have a good 5G QoE performance?

MedUX, a global leader in internet QoE testing and monitoring, unveils its latest findings on 5G performance in the Belgian capital and across Europe. Our Brussels 5G QoE Benchmarking report reveals two very good winners and a strong contender.
