

Bolivia Photosynthetic Energy Storage Project

Overview

Should Bolivia use solar energy to generate synthetic fuels?

Using Bolivia's own excellent solar resources to generate synthetic fuels in BPS-1 and BPS-2 would result in energy independence and security. Due to the lack of GHG emission costs in BPS-3 fuel costs remain for the fossil fuels used in the heat and transport sectors. Fig. 23.

What is the primary source of energy for Bolivia?

The primary source of energy for Bolivia from this study is solar PV. Such high shares of solar PV in Bolivia are supported by solar resource findings in Breyer and Schmid (2010), which determined Bolivia to be among the ten countries with the maximum solar irradiation for fixed optimally tilted PV systems.

What will be Bolivia's energy transition?

This transition for Bolivia would be driven by solar PV based electricity and high electrification across all energy sectors.

Does Bolivia have a lithium resource?

Given that Bolivia's PT region is home to the largest lithium reserve in the world (Sauer et al., 2015), development of cost of Bolivia's own lithium usage as extraction of this resource develops may influence decision makers regarding lithium applications in the Bolivian energy system.

What are the policy guidelines for the energy sector in Bolivia?

The Bolivian government has established the following policy guidelines for the energy sector: energy sovereignty, energy security, energy universalization, energy efficiency, industrialization, energy integration, and strengthening of the energy sector (MHE, 2014).

Does Bolivia have a long-term energy plan?

As previously mentioned, the Bolivian government does not provide any long-term energy planning study, however, the UNFCC (2015b) states that RE will compose 81% of electricity generation by 2030. Bolivia's scenario for 2027 according to MHE (2009) states that biomass sources will comprise 8% of total final energy demand.

Bolivia Photosynthetic Energy Storage Project

Grid storage system Bolivia

Grid storage system Bolivia The world"s largest PV-diesel hybrid power plant system with battery storage was commissioned in December 2014, in the Bolivian province of Pando. SMA is not ...
