

Botswana Base Station Power Management System

Overview

What is the power sector in Botswana?

Revised in April 2025, this map provides a detailed view of the power sector in Botswana. The locations of power generation facilities that are operating, under construction or planned are shown by type – including liquid fuels, gas and liquid fuels, coal, hybrid, hydroelectricity and solar.

How will Botswana improve energy access?

Additionally, the project will support the Government of Botswana's ongoing efforts to enhance energy access by financing grid expansion to rural villages and improving electricity services in the Southern districts.

Where does Botswana get its power?

In 2023, BPC agreed to procure up to 600 MW of power generation from a yet-to-be-built coal-fired power station. Additionally, Botswana imports the bulk of its power from South African utility Eskom, and the rest from Nampower (Namibia), Zesco (Zambia), and the Southern African Power Pool (SAPP), to make up for any production shortfalls.

How much electricity does Botswana need?

The average electricity demand for Botswana is at 850megawatts (MW), against ageneration capacity of 893MW. Demand of electricity is projected to grow to over 1200MW by2030. Additional energy is imported from South Africa. Botswana generates 48%of its power and imports 52%from the Southern African Power Pool (SAPP)7.

Is the Botswana Power Corporation poised for major structural changes?

A general view of the power grid. (Pic: MONIRUL BHUIYAN/PRESS PHOTO) The Botswana Power Corporation (BPC) is poised for major structural changes, according to a document released by the Public Enterprises Evaluation and Privatisation Agency (PEEPA).

Why does Botswana need a secure electricity supply?

There is need to improve the security of power supply to support higher productivity. The country's national electricity access rate increased from 62.6% in 2017 to 81.5% in 2020, in line with Vision 2036 that targets universal access by 2030. The average electricity demand for Botswana is at 850megawatts (MW), against ageneration capacity of 893MW.
