

British outdoor power supply custom manufacturer

Overview

Who makes a custom power supply?

Celab has been manufacturing custom power supplies for over 50 years. We have an enthusiastic team of power designers - the driving force behind the innovative power solutions that make us leaders in our field. Why choose Celab as your custom power supply designer?

.

How does a custom power supply design work?

When you receive the initial custom power supply design our power supply designers discuss the design with you. The client then has # days to approve or review the design. When the design is approved Celab moves it across to our power supply manufacturing floor, which is conveniently located across the room from the power designers.

What happens when a power supply design is approved?

When the design is approved Celab moves it across to our power supply manufacturing floor, which is conveniently located across the room from the power designers. It is then put into assembly across multiple teams and machines. All Celab's custom power supplies are rigorously tested before being sent out for installation.
