

Cambodia solar panel greenhouse supply

Overview

Is solar energy a good source of energy in Cambodia?

Solar energy in Cambodia is the country's second most promising clean energy source behind hydropower. Hydropower remains Cambodia's most developed renewable energy source but also has its own challenges – such as yearly variability due to droughts and floods.

How much does solar energy cost in Cambodia?

One of the promising traits of solar energy in Cambodia is its cost. The average electricity price for solar power is around USD 0.03 per kW, significantly lower than that of coal, which is USD 7.7 per kW.

How many solar power plants are there in Cambodia?

Just two solar power plants are up and running in Cambodia at present, one a 10-MW plant developed by Singapore's Sunseap and another, 60-MW facility in Kampong Speu. Cambodia consumed a total of 2,650 megawatts of electricity in 2018, an increase of about 15% compared to 2017, according to the Ministry of Mines and Energy.

Will Cambodia increase its solar energy investment by 12%?

Rattanak said during a forum on energy in Phnom Penh in July organized by the American Chamber of Commerce. The Cambodian government has said it will increase its investments in solar energy by 12% by year-end 2020 and by 20% over the next three years, up from less than 1% at present.

Why should Cambodia invest in solar panels?

Despite facing significant challenges, Cambodia possesses several advantages that would support the continued development of its solar panel industry. Cambodia can diversify its export destinations from the U.S. to developing economies, such as those in the Middle East or Africa who are transiting to greater use of renewable energy.

How many energy projects are coming to Cambodia?

The Cambodian Cabinet approved four energy projects this past April, a US\$231 million hydroelectric power and three solar power projects with a combined, rated, maximum power capacity of 140 MW. The latter are expected to come online and dispatch power to the national grid by 2020 and 2021 in four different provinces.
