

# Canada s energy storage policy for new energy projects

#### **Overview**

#### What is Canadian energy storage?

The blueprint for Canadian energy storage. Located in Haldimand County, Ontario, Oneida Energy Storage is a fully operational, 250 MW/1,000 MWh lithium-ion battery energy storage facility. It represents Canada's largest operational energy storage facility, and is amongst the largest energy storage projects globally.

How can Canadian companies create energy systems of the future?

technologies are crucial to creating energy systems of the future. Canadian firms show expertise across the energy storage value spectrum from energy a bitrage services, flexibility services to of-grid electrification. Canadian companies provide innovative energy storage solutions for ind.

What laws govern the permitting of new electricity projects in Canada?

Every order of government in Canada has laws that govern the permitting of new electricity generation, transmission, distribution, and storage facilities (see Appendix C). The federal Impact Assessment Act addresses the permitting of major projects listed as designated projects as well as a wide range of projects on federal lands.

How many energy storage projects are there in Alberta?

While there are nearly 50 energy storage projects currently listed within the Alberta Electric System Operator (AESO)'s projects list, the development of a 600MW portfolio of five solar-plus-storage projects by Westbridge Renewable Energy Corp. is underway.

Is government funding for energy storage projects increasing?

Government funding for energy storage projects is increasing. The Smart Renewables and Electrification Pathways program (SREPs)—which supports clean electricity projects—recently announced \$500 million in additional

funding and a new round of intakes for the Utility Support Stream.

Is energy storage a key path to net-zero in Canada?

A 2022 report titled Energy Storage: A Key Pathway to Net Zero in Canada, commissioned by Energy Storage Canada, identified the need for a minimum of 8 to 12GW of installed storage capacity for Canada to reach its 2035 goal of a net-zero emitting electricity grid.
