

# Charge retention capacity lithium battery pack

#### **Overview**

Tips for Lifespan, Charge Retention, and Maintenance Battery packs lose power over time because of limited charge-discharge cycles. Lithium-ion batteries usually maintain 80% capacity after around 500 cycles. Other types of batteries may last 800-900 cycles.

#### <u>Capacity Retention in Lithium-ion</u> Batteries

In simple terms, capacity retention refers to the ability of a battery to maintain its storage capacity over time and through various charge-discharge cycles. A brand-new lithium-ion battery, for ...

### What is the charge retention of a li polymer battery pack?

So, let's dive right into what charge retention of a li polymer battery pack is all about. First off, charge retention is basically how well a battery can hold onto its charge over a period of time.
