

Charging equipment and energy storage equipment

Overview

What is charge Qube?

With its robust, adaptable design, Charge Qube is the definitive solution for businesses looking to future-proof their energy infrastructure, reduce emissions, and embrace the benefits of sustainable energy storage and high-performance EV charging. Key Features & Configurations.

Why should your business use a battery energy storage system?

Provide your customers with the green amenities they need and future-proof your business all while generating savings on your utility bill. Utilize our battery energy storage system for high power output applications, improved resilience, and energy arbitrage. Supercharge your electric fleet with our industrial charging applications.

What are the different types of energy storage options?

Scalable, Modular Energy Storage: Configurations range from 150kWh to 450kWh, with daisy-chaining options for extended capacity. Energy Storage Only – Providing flexible, off-grid power solutions. CCS DC Fast Charging – Featuring dual 150kW CCS chargers, suitable for high-speed public and commercial EV charging.

Why should you use a DC fast charger?

Our DC fast chargers, powered by microgrid-scale energy storage, is able to provide travelers with rapid and resilient charging. By enhancing your services, reducing operating costs, and providing your site with a resilient grid. By integrating these components, our solution supports robust and sustainable EV charging infrastructure.

Why should you use battery-integrated EV charging stations?

Make EV charging convenient, enjoyable, and keep your guests coming back. With our battery-integrated EV charging stations, utilities can significantly

enhance their electrical infrastructure, paving the way for widespread electric vehicle adoption.

How can EV charging improve retail resiliency?

New Possibilities. Attract retail customers while they shop and deploy DC fast charging technology all while improving store resiliency. Retail stores face numerous challenges when electrifying and offering EV charging. We've identified and addressed these challenges through our innovative technology.
