

Civilian communication green base station frequency

Power Conversion System

- Single-stage three-level modularization
- Multi-branch input to reduce battery series and parallels connection

Overview

What MHz is allowed on a CB radio?

[f] Internet gateways and radio repeaters are allowed on channels 18 [27.175 MHz] and 23 [27.255 MHz]. Paging is permitted on channel 1 (26.965 MHz) and channel 80 (26.955 MHz) is the recommended call channel for Czech CB radio operators.

What frequencies can be assigned to public safety services?

NG34 The bands 758-775 MHz and 788-805 MHz are available for assignment to the public safety services, as described in 47 CFR part 90. NG35 Frequencies in the bands 928-929 MHz, 932-932.5 MHz, 941-941.5 MHz, and 952-960 MHz may be assigned for multiple address systems and associated mobile operations on a primary basis.

What frequencies can cap stations use?

CAP stations are authorized to use any CAP frequency assigned to any region to pass this traffic. CAP stations are also authorized to access specified frequencies of participating federal agencies to pass this traffic if it cannot be passed on CAP's frequencies.

What frequencies are allowed for non-Federal Communication with helicopters?

US282 In the band 4650-4700 kHz, frequencies may be authorized for non-Federal communication with helicopters in support of off-shore drilling operations on the condition that harmful interference will not be caused to services operating in accordance with the Table of Frequency Allocations.

What frequency can a land station use?

In addition, land stations and mobile stations operated by non-Federal conservation agencies, for mobile relay operation only, may be authorized to use the frequency 172.275 MHz east of the Mississippi River and the

frequency 171.475 MHz west of the Mississippi River.
