

Communication Base Station Electrical Cabinet Company

Overview

What is a communication base station?

Communication base station setups will usually include a wide array of different technologies, including power supplies, data servers, head end, radio repeaters, and communication systems that allow for high-speed continuous information flow. It can also be used as part of a leaky feeder system in the communication network.

What materials can be used for a telecom pedestal enclosure?

Whether you need a telecom pedestal enclosure or a large cabinet with multiple doors, our team will create a design using your choice of stainless steel, carbon steel or lightweight aluminum. You can also choose from a wide range of optional features to include in your custom design, including:

Why should you choose NEMA Telecom cabinets?

Dust and debris: Our products keep dust and foreign objects from interfering with your critical electrical systems, helping you avoid damage and interruptions. Moisture and corrosion: All of our NEMA telecom cabinets stop the rain, sleet, snow and ice from getting in, eliminating issues and losses caused by corrosion.

Why do I need a telecommunications cabinet?

These cabinets also make it easy for technicians to reach the ports they need to expedite service. Patch panels: If your telecommunications system incorporates patch panels to connect and manage your incoming network cables, you can keep them safely stored in your cabinet.
