

Construction of the Dominica Wind Solar and Energy Storage Project

Overview

How can the Dominican Republic integrate solar and wind resources?

The short-term variability and geographic diversity of the wind resource will need to be studied before implementation of projects. The Dominican Republic has created a framework for integrating solar and wind resources in its grid that can drive renewable energy adoption for years to come.

What is the Dominican energy project?

This project is designed to support the Commonwealth of Dominica in developing and integrating clean, sustainable and low-cost energy. Through this \$38.5 million project, a new robust transmission network will be built to withstand natural hazards, strengthening Dominica's electricity grid.

How many solar projects are there in the Dominican Republic?

The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV e lectrical energy. These projects cover an installed capacity between 3 MW and 58 MW (see Fig. 5.). Next, a brief inventory first of its kind in the country.

What is the Dominicana Azul solar project?

The Comisión Nacional De Energia (CNE) of the Dominican Republic announced the start of work on the Dominicana Azul solar project shortly in late December (22 December). Construction has started on the first major solar-plus-storage project in the Dominican Republic, featuring a 99MWh battery system.

How is Dominica transforming geothermal energy?

"Dominica is making significant strides in geothermal energy, with innovative investments to deliver clean, low-cost electricity to its citizens and thereafter, the Eastern Caribbean. With support from the World Bank and the Government of Canada, we are building a resilient network for geothermal

energy transmission.

Is Zenith launching a solar farm in the Dominican Republic?

Source: Comisión Nacional de Energía () Zenith Energy Corp SRL, a subsidiary of Blacktree Capital Management, has initiated construction of the 101.2-MWp Dominicana Azul solar farm in the Dominican Republic, launching a project that will boast the Caribbean nation's first battery energy storage system (BESS).
