

Costa Rica under construction energy storage power station

Overview

Costa Rica had an estimated installed generating capacity of 3,039 MW in 2012 and produced an estimated 10.05 billion kWh in 2012. According to La NaciónCosta Rica in 2014 had an installed capacity of 2,732 MW with a peak consumption of 1,604 MW.

Geothermal power plants with a nameplate capacity > 100 MW. There are further geothermal power plants with a smaller capacity.

Thermal power plants with a nameplate capacity≥ 200 MW. There are further thermal power plants with a smaller capacity.

Hydroelectric power plants with a nameplate capacity > 30 MW. There are further hydroelectric power plants with a smaller capacity. The proposed 630 MW El Diquísdam was.

This list includes all known power plants of any kind of fuel source in Costa Rica, some minor power plants might be missing, and.
