

Cote d Ivoire communication base station power supply

Overview

How much power does Côte d'Ivoire have?

With an installed power capacity of almost 2,230 megawatts (MW), Côte d'Ivoire fully meets its domestic demand and exports the roughly 10% generation surplus to the subregion.

What is the voltage in Côte d'Ivoire?

Just like in many former French colonies, the voltage in Côte d'Ivoire (Ivory Coast) is 220 volts and the frequency is 50 Hz. Click here for a global map showing the spread of the different plug types used around the world.

How much solar energy is produced in Côte d'Ivoire?

Most recently, under the World Bank Group's Scaling Solar Initiative, IFC is supporting the development of two public-private partnerships to generate 60 MW of solar energy. Today, private operators in Côte d'Ivoire are currently responsible for 70% of energy production and 100% of its distribution.

Do Ivorians have access to electricity?

Whereas only 34% of Ivorians had access to electricity back in 2013 when the post-electoral crisis triggered a 40% decline, close to 94% of Ivorians are now connected to the grid and the most destitute customers benefit from a subsidized rate.

Why did Côte d'Ivoire privatize its electricity sector?

Côte d'Ivoire's decision to privatize a portion of its electricity sector paved the way for one of the continent's most robust energy systems that continues to expand and innovate with clean energy solutions. This feat would not have been possible without private sector involvement and complex financial packages.

What types of plugs are used in Côte d'Ivoire?

In Côte d'Ivoire (Ivory Coast), types C and E are the official standards. Since type F plugs are identical to type E plugs, they can also be used with type E sockets. Côte d'Ivoire has standardized on the same plugs and receptacles as France, just like almost all other former French colonies.
