

Cote d Ivoire outdoor power supply solar charging current limiting function

Overview

Why should Côte d'Ivoire invest in a solar power plant?

The solar power plant is regarded as a model project for the expansion of solar energy in Côte d'Ivoire. It is an important contribution to the fight against climate change and a decisive step towards increasing the share of renewable energies in the country's electricity supply to 45% by 2030.

Why did Côte d'Ivoire become a leading electricity exporter in West Africa?

Those tough years nevertheless provided Côte d'Ivoire with an opportunity to find a unique, innovative energy solution, paving the way for the country to develop the third largest electricity generation system on the continent and become one of the leading electricity exporters in West Africa.

How much solar energy is produced in Côte d'Ivoire?

Most recently, under the World Bank Group's Scaling Solar Initiative, IFC is supporting the development of two public-private partnerships to generate 60 MW of solar energy. Today, private operators in Côte d'Ivoire are currently responsible for 70% of energy production and 100% of its distribution.

Will solar power supply increase in Côte d'Ivoire by 2050?

We develop a TIMES model of the electricity sector for Côte d'Ivoire that provides least-cost solutions for power systems. Our estimates show that electricity demand could increase by a factor of 4.5 by 2050. Least cost solutions show that solar PV could provide at least 18% of total electricity generation in 2050.

How much power does Côte d'Ivoire have?

With an installed power capacity of almost 2,230 megawatts (MW), Côte d'Ivoire fully meets its domestic demand and exports the roughly 10% generation surplus to the subregion.

Will Côte d'Ivoire have a low-cost solar system?

In the case of a low-cost solar scenario, PV capacity is up to 24 GW and storage is nearly 15 GW between 2030 and 2050. In closing its economic gap with emerging markets, Côte d'Ivoire will face a substantial increase in electricity demand over the next three decades.
