

# Croatia s first energy storage power station goes into operation

#### **Overview**

(HEP) is the national energy company charged with production, transmission and distribution of electricity. At the end of 2022, the total available power of power plants on the territory of the Republic of Croatia was 4,946.8 MW, of which 1,534.6 MW in thermal power plants, 2,203.4 MW in hydropower plants, 986.9 MW in wind power plants an.

What was the first hydroelectric power plant in Croatia?

The hydroelectric power plant "Krka" (later called Jaruga I) was the first commercial polyphase alternating current (AC) power system in Croatia, the first such hydro power plant in Europe, and second in the world. It was set in operation on 28 August 1895, at 20:00, two days after the famous Adams Power Plant on the Niagara Falls.

How does Croatia get its electricity?

Croatia satisfies its electricity needs largely from hydro and thermal power plants, and partly from the Krško nuclear power plant, which is co-owned by Croatian and Slovenian state-owned power companies. Renewable energies account for approximately 31.33% of Croatia's energy mix.

How many power plants are there in Croatia?

At the end of 2022, the total available power of power plants on the territory of the Republic of Croatia was 4,946.8 MW, of which 1,534.6 MW in thermal power plants, 2,203.4 MW in hydropower plants, 986.9 MW in wind power plants and 222.0 MW in solar power plants.

Who owns a power station in Croatia?

All power stations in Croatia are owned and operated by Hrvatska elektroprivreda (HEP), the national power company. As of 2015, HEP operates 26 hydroelectric, 4 thermal and 3 cogenerating power plants with the total installed electrical power of 3.654 MW.

Why is vis the first solar power plant in Croatia?

With this first large solar power plant on a Croatian island, Vis has its own source of renewable energy and greater security of electricity supply, notably during summer when consumption is higher, it was said at the inauguration.

Does Croatia have a nuclear power plant?

Croatia has no nuclear power plants on its territory, but co-owns the Krško Nuclear Power Plant together with Slovenia. The Krško plant was built in the era of Yugoslavia on the territory of present-day Slovenia. Planned decommissioning is by 2043. In 2014, HEP built nine solar power plants on the roofs of business buildings.
