

# Current price of energy storage power in Estonia

#### **Overview**

You've probably noticed the headlines: Battery energy storage system (BESS) prices in Tallinn have fallen 45% year-over-year, with recent projects hitting €0.11/Wh (≈\$0.12/Wh). But what's driving this unprecedented price erosion?

Let's unpack the market forces reshaping Estonia's energy landscape. Who sells electricity in Estonia?

In Estonia's electricity market, Eesti Energia is the largest seller with a 60% market share and owns the largest distribution network, representing 86% of the distribution market. The Estonian Competition Authority (ECA) regulates transmission and distribution rates, as well as connection charges. Electricity in 2020:.

How much energy does Estonia use?

Estonia's all-time peak consumption is 1591 MW (in 2021). In 2021 the electricity generated from renewable energy sources was 29.3 %, being 38% of the share of renewable energy in gross final energy consumption. Oil-based fuels, including oil shale and fuel oils, accounted for about 80% of domestic production in 2016.

How much energy does a shower save in Estonia?

As Estonia continues to evolve its energy sector, it remains committed to sustainability, efficiency, and regional cooperation. With the energy-saving shower, you can save up to 50% energy compared to standard shower heads. Or you can shower half the time. With the electricity price today in Estonia you can save 0.64 € for each shower.

What is the lowest spot price in Estonia?

Lowest spot price today is 3 ct/kWh in area EE1. Highest is 16 ct/kWh in area EE1. How much does it cost right now?

Detailed spot price on electricity hour by hour in Estonia today. Check how

much it cost to use electrical appliances with the current electricity prices in Estonia.

What is the largest power plant in Estonia?

The largest power complex in the country, Narva Power Plants, consists of the world's two largest oil shale -fired thermal power plants. The complex used to generate about 95% of total power production in Estonia in 2007. Falling to 86% in 2016 and 73% in 2018.

How much wind power does Estonia have?

Total installed wind power was 149 MW at end of 2010 and grew to 303 MW in 2014 and 329 MW in 2016. Record production of wind parks is 279 MW in 2014. Estonia has target of 14% (1.5 TWh) and total renewable electricity 1.9 TWh (17.6%). According to the national Energy Action Plan (2020) planned shares are onshore 9% and offshore 5%.
