

# Czech Electric s new energy storage model

### **Overview**

ČEZ Group (the national energy giant) just installed a 8.6 MWh battery system in Mydlovary. That's enough to power 3,000 Czech households during peak Netflix hours. Their secret sauce?

Combining lithium-ion with Al-driven load forecasting. Fancy, huh?

Remember those 1970s pumped storage plants?

How will a storage system help the Czech energy sector?

The storage system will support the transformation of the Czech power sector and contribute to the stabilisation of the power grid by providing power balance services. "Europe's energy sector is changing dynamically, but a secure energy supply and network stability remain the cornerstones.

Will a house-sized battery help stabilize the Czech energy grid?

The House-sized Battery Will Help Stabilise the Czech Energy Grid \*The battery storage capacity is 10 MW and it exceeds the current largest battery in the Czech Republic by more than 40%. \*The system can hold 9.45 MWh of energy, three times the size of the ČEZ battery in Tušimice.

What is the largest battery in the Czech Republic?

The latest contribution is the largest battery in the Czech Republic with an output of 10 MW, which is being built under the supervision of ČEZ ESCO on the premises of Energocentrum Vítkovice and will be fully operational in the second half of this year.

Is electric energy storage a hero?

Enter Czech electric energy storage – the unsung hero keeping the lights on when renewables go wild. In a country aiming for 22% renewable energy by 2030, storage isn't just trendy; it's survival. Who's Reading This?

Target Audience Unpacked Energy Nerds: Engineers craving technical deepdives into lithium-ion vs. flow batteries.
