

Danish energy storage power station revenue

Overview

Does Danish Energy Agency publish monthly energy production and consumption statistics?

Danish Energy Agency has published monthly energy production and consumption statistics, which are available online in excel format. (Latest version: June 2025. Next version for July 2025 will be available 12 th of September 2025). Since January 2005, the Danish Energy Agency has published a monthly oil supply statistics.

Should Denmark invest in energy storage?

Denmark has already invested in energy storage technologies, but there is room for expansion in these areas. By investing in energy storage, Denmark could improve the reliability of its wind energy supply and reduce the need for backup power from conventional power plants. Increased collaboration with neighboring countries.

Can energy storage units be installed in the Danish power system?

Elsystemansvar A/S (subsidiary of Energinet) has asked Ea Energy Analyses to analyse the benefits and main drivers for the installation of storage units in the Danish power system. This will supplement the technology aspects in the recent Technology Catalogue on Energy Storage (DEA and Energinet, 2019).

Can a hydrogen-based energy storage system be used in Denmark?

Bulk physical storage of renewable energy produced gases can act as a longerterm storage solution (hours, days, weeks, months) to help maintain flexibility in a fossil-free energy grid (The Danish Partnership for Hydrogen and Fuel Cells). Without the hydrogen scenario, the potential for hydrogen-based energy storage in Denmark will be limited.

When will the Danish Energy Agency publish a monthly coal and coke supply statistics?

Since January 2001, the Danish Energy Agency has published a monthly coal and coke supply statistics. (Latest version: June 2025. Next version for July 2025 will be available 12 th of September 2025). The Danish Energy Agency prepares monthly gas supply statistics, which are available online in excel format. (Latest version: June 2025.

Does Denmark have a strong energy transition?

Denmark's energy transition has been supported by its strong research and development sector. The country has invested in research and development in areas such as renewable energy, smart grids, and energy storage.
