

# Differences between Dutch energy storage batteries

### **Overview**

Do Dutch home battery purchases keep driving battery storage installations?

Dutch home battery purchases keep driving battery storage installations. According to Dutch New Energy Research's Nationaal Smart Storage Trendrapport 24/25, 410 MWh of new battery capacity was installed in the Netherlands in 2023 – 1 MWh is enough to power a couple hundred homes for a day.

Is the Netherlands a good market for battery storage?

The Netherlands is an emerging market for battery storage but, due to the lack of saturation, also a highly exploitable one. In early 2025, enspired, together with Flexcity and S4 Energy, reached an exciting milestone by taking the country's first 4-hour BESS live in a cross-market optimization setup.

Are batteries a barrier to energy storage in the Netherlands?

Under the Electricity Act 1998, generation is exempt from the payment of transmission costs, but consumption is not. This highlights one of the main barriers to energy storage in the Netherlands, as batteries currently pay more transmission costs than polluting wholesale consumers.

Will net metering boost home battery storage in the Dutch market?

The envisaged gradual phase-out of net-metering scheme, beginning in 2025, is expected to boost home battery storage in the Dutch market. In order for certain environmentally harmful activities to be performed, Dutch law requires an environmental permit to be obtained by the developer.

Are battery energy storage installations limiting the deployment of battery energy systems?

While lengthy authorization processes are limiting the deployment of battery energy storage installations (BESS), the lion's share of purchased battery systems is in the residential sector. In fact, the paper shows that 98% of the

Dutch installations are small ones (less than 20 kWh).

Are batteries a sustainable solution to future-proof the Netherlands' electricity system?

Batteries, both BTM and grid-scale FTM (front-of-the-meter), play an important role in mitigating such challenges and offer a sustainable solution to future-proof the Netherlands' electricity system. But how can it integrate more batteries if the grid struggles to handle the current load?

### Differences between Dutch energy storage batteries

## Storage system in Amsterdam stadium shows ...

The project was initiated by Ajax and environmentally conscious businesses, including Nissan, Eaton Corp and the Amsterdam Climate and ...
