

Distributed power generation at communication base stations in Algeria

Overview

What is a photovoltaic-diesel hybrid system for mobile phone base station?

This work concerns the techno-economic study of photovoltaic-diesel hybrid system for mobile phone base station located in Oum el Bouaghi city (in southern Algeria). This system is made up mainly of a photovoltaic panel, a diesel generator, power converter and lead-acid battery.

How much electricity is generated in Algeria?

In 2017, 71,470 GWh of electricity was generated in Algeria. This was comprised of: 500 GWh from photovoltaic solar (0,70%). In the early 2000s, institutional reforms brought about significant changes in the electricity and gas distribution sector in Algeria.

How many wind power plants are there in Algeria?

The 10.2 MW wind power plant in Kabertène (Adrar), comprising 12 wind turbines with a rated power of 850 KW each (commissioned in 2014). Between 2015 and 2018, power plants were installed mainly in cities located in southern Algeria (Adrar, Illizi, Tamanrasset, Djelfa, Laghouat) for a production capacity of 343 MW.

What is the law governing foreign investment in Algeria?

The Law No. 16-09 of 03 August 2016 on investment promotion is the main legislative instrument governing foreign investment in Algeria.
