

Does Finland have Chinese communication base station flow batteries

Overview

What does Finland's new lithium-ion battery plant mean for the battery industry?

The announcement was made on Wednesday 20 March 2025, marking a major step in the development of Finland's battery value chain. The plant will produce CAM, a key component in lithium-ion batteries, with an initial capacity of 60,000 tonnes per year. Future expansion is also part of the long-term plan.

How will Finland support the cam initiative?

The Finnish State will also support the initiative by capitalising Finnish Minerals Group with EUR 100 million. "With the Kotka CAM plant, we are creating an entirely new kind of industry in Finland related to the production of lithium-ion batteries," says Matti Hietanen, CEO of Finnish Minerals Group.

What percentage of Finland's Electricity is generated by wind turbines?

In 2022, 14.1% of Finland's electricity was generated by wind turbines with a collective capacity of almost 5.7 GW^2 (+76%). That capacity is expected to increase to almost 9 GW by 2025.

Does CNGR Finland have to pay a fishery fee?

The CNGR Finland bid drew hundreds of concerned responses last summer. According to the decision, the company must comply with emission restrictions and pay an annual fishery fee. A sign marking land reserved for the planned battery parts factory (file photo). Image: Antro Valo / Yle.

How many 5G base stations are there in China?

As of July 2021, the three largest mobile network operators in China, including China Mobile, China Unicom, and China Telecom, have established 916,000 5G base stations domestically, which comprise 70% of the global total.

Why did CNGR Finland change its plans?

CNGR Finland revised its plans for the factory after Avi received hundreds of responses from the public regarding its application. The most common concerns were related to discharge of wastewater into the sea and its effect on fish stocks and real estate.
