

# **Dominican New Energy Photovoltaic Solar Panels**

#### **Overview**

How many solar projects are there in the Dominican Republic?

The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV e lectrical energy. These projects cover an installed capacity between 3 MW and 58 MW (see Fig. 5.). Next, a brief inventory first of its kind in the country.

Are there solar power stations in the Dominican Republic?

Photovoltaic Power Stations (current and possibles - in study) in Dominican Republic. Own elaboration. The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV e lectrical energy.

Why did the Dominican Republic build a photovoltaic plant?

The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy. DOMINION took on the task of building the photovoltaic plant in this Caribbean country, with an offer that included everything from the design and construction of the plant to its operation and subsequent maintenance.

What is the installed capacity of photovoltaic energy in the Dominican Republic?

The installed capacity of photovoltaic energy in the Dominican Republic is 0.43 GW. 5. Photovoltaic energy in the Dominican Republic is increasing rapidly and could 1. Introduction currently a topic of high priority and relevance worldwide. Among these strategies are those that lead to the reduction of greenhouse gases (GHG) .

Does the Dominican Republic have solar energy?

solar energy has had in the Dominican Republic and its future outlook. A global overvie w of Republic and the social aspects are presented. A review of

the solar resource within the average radiation of more than 5.2 kWh /m2/day was obtained. On the other hand, a review sources, through the offer of incentives.

What is the future of photovoltaic energy in the Dominican Republic?

Finally, the future perspectives of photovoltaic energy in the country are presented, based on current studies of projects that could be installed in the near future. It is estimated that the Dominican Republic could exceed 1.5 GW installed by 2030.
