

Double-sided solar panels for power generation

Overview

Manufacturers are now able to produce bifacial panels, which feature energy-producing solar cells on both sides of the panel. With two faces capable of absorbing sunlight, bifacial solar panels can be more efficient than traditional monofacial panels – if used appropriately.

Double-sided solar panels for power generation

Bifacial solar panels: what it is, advantages and disadvantages

The process of installing bifacial solar panels is similar to that of regular single-sided solar panels, but due to their double-sided design, there are some special ...
