

East Asia Power Storage

Overview

Does ASEAN need energy storage?

The ASEAN energy storage landscape is undergoing a significant transformation driven by the region's ambitious renewable energy goals and growing energy demands. The ASEAN Centre for Energy (ACE) projects the region's total final energy consumption to increase by 146% by 2040, highlighting the urgent need for robust energy storage systems.

What is the future of power generation in East Asia?

46Potential East Asia 2023 Thermal efficiency of power generation is projected to improve for coal-fired power plants, from 36.3% in 2019 to 48.4% in 2050.

How many terawatt-hours (TWh) does East Asia generate?

304Potential East Asia 2023 Meanwhile, the country's total electricity generation in 2019 reached 106.4 terawatt-hours (TWh). Coal-fired power plants remained as the major source for power generation with total installed capacity of 10,417 MW during the period. Coal contributed 54.6% or 57.9 TWh in the total power generation mix of the country.
