

# East Asia Solar Power Supply System

#### **Overview**

Does South East Asia have a solar PV market?

The South East Asia region is an emerging photovoltaic market at its earlystage growth. ASEAN countries are expected to have substantial growth in solar PV deployment. The PV market in the ASEAN region has not evolved into a solid, self-sustaining PV market. Hence there is a necessity for policies and support mechanisms in ASEAN countries. Fig. 1.

Is Southeast Asia ready for solar energy?

Positioned near the equator, Southeast Asia's solar irradiance levels was up 10 per cent in 2023, highlighting the region's potential for solar energy advancement. Southeast Asia's total solar and wind energy generation have surged from 4.2 terawatt-hours (TWh) in 2015 to over 50 TWh in 2022.

Are solar PV policies underutilized in South East Asian countries?

South East Asian countries are blessed with abundant solar energy potential. Yet, the solar photovoltaic potential remains underutilized. There are certain roadblocks in the progress of solar PV deployment in ASEAN. This paper aims to investigate the solar PV policies in the ASEAN region over the past decade.

How much solar & wind energy is in Southeast Asia?

New analysis by the International Energy Agency (IEA) indicates that the share of solar and wind energy in the power generation mix in Southeast Asian countries must reach approximately 23% by 2030 to align with the 2050 Net Zero Emission (NZE) scenario. Combined solar and wind generation in ASEAN grew from 4.2 TWh to 50 TWh between 2015 and 2022.

How effective are solar energy systems in Southeast Asia?

The effectiveness of these systems depends on solar irradiation levels which measure the intensity of sunlight. Positioned near the equator, Southeast Asia's solar irradiance levels was up 10 per cent in 2023, highlighting the

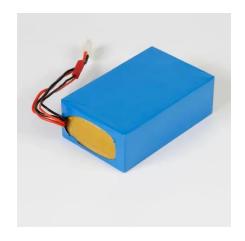

region's potential for solar energy advancement.

Are there support mechanisms for solar PV development in ASEAN countries?

ASEAN countries are expected to have substantial growth in solar PV deployment. The PV market in the ASEAN region has not evolved into a solid, self-sustaining PV market. Hence there is a necessity for policies and support mechanisms in ASEAN countries. Fig. 1. Different types of support mechanisms for solar PV development. 3.1.
