

East Timor Power Generation Container

Overview

Hera Diesel Power Plant is a 119 MW on the coast at , about 15 km east of in . Built under the 2008 National Electricity Project and owned by state utility EDTL, it forms one half of the country's twin-site diesel system together with the Betano plant, supplying the bulk of Timor-Leste's and acting as a strategic reserv.

How much electricity does Timor-Leste use?

Timor-Leste consumes 125 GWh of electricity per annum, an average of 95 kWh per person. The country has about 270 MW of electricity capacity, 119 MW in the city of Hera. Most of the energy infrastructure was destroyed by the Indonesian militias during the 1999 East Timorese crisis.

Why is East Timor struggling to overcome its dependence on diesel?

East Timor, a small country in Southeast Asia, is struggling to overcome its heavy dependence on diesel despite significant commitments to renewable energy. Although the government has promised to promote wind, solar, and hydropower, the transition remains slow.

Is biomass a source of electricity in East Timor?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. East Timor: How much of the country's electricity comes from nuclear power?

Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does East Timor need financing?

The share of renewable energy in the country's energy mix has only made slow progress in recent years, indicating that additional efforts are needed to meet the set goals. One of the main obstacles for East Timor remains financing.

Is East Timor a polluting country?

Currently, electricity in East Timor is primarily generated by diesel -powered plants, a highly polluting energy source. These facilities, while essential for meeting the country's energy needs, significantly contribute to greenhouse gas emissions and harm the environment.

Who owns Timor-Leste's power plant?

Built under the 2008 National Electricity Project and owned by state utility EDTL, it forms one half of the country's twin-site diesel base load system together with the Betano plant, supplying the bulk of Timor-Leste's grid power and acting as a strategic reserve while policymakers explore gas conversion and expanded renewables.
