

Energy storage cabinet battery prices drop

Overview

Lithium-ion battery pack prices dropped 20% from 2023 to a record low of \$115 per kilowatt-hour, according to analysis by research provider BloombergNEF (BNEF). How much does a battery storage system cost?

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024.

Why did lithium-ion battery prices drop 20% from 2023?

Lithium-ion battery pack prices dropped 20% from 2023 to a record low of \$115 per kilowatt-hour, according to analysis by research provider BloombergNEF (BNEF). Factors driving the decline include cell manufacturing overcapacity, economies of scale, low metal and component prices, adoption of lower-cost lithium-.

Are lithium-ion batteries a viable storage solution?

Plenty of lithium-ion alternatives are being actively piloted for their viability, technologies ranging from Natron's sodium-ion battery to EnerVenue's metal-hydrogen vessel; from gravity storage to IceBricks, it seems like there's a storage solution for any situation.

What is the demand for lithium-ion batteries in 2024?

That is more than 2.5 times annual demand for lithium-ion batteries in 2024, according to BNEF. While demand across all sectors saw year-on-year growth, the EV market – the biggest demand driver for batteries – grew more slowly than in recent years.

Are lithium-ion batteries still economical?

Lithium-ion batteries are still the most economical solution for most situations, even without considering their trend downward pricing trend, but it takes a

village, as they say- and ours should be doing all it can to ensure storage stays an economical solution for the foreseeable future.

Is battery overcapacity rife?

Currently, overcapacity is rife, with 3.1 terawatt-hours of fully commissioned battery-cell manufacturing capacity globally. That is more than 2.5 times annual demand for lithium-ion batteries in 2024, according to BNEF.
