

# Energy storage power supply shipped to Europe and the United States

#### **Overview**

What is the market share of energy storage in 2024?

By technology, batteries led with 82% of the United States energy storage market share in 2024, while hydrogen storage is projected to expand at a 28.5% CAGR through 2030.

What is a battery energy storage supply chain forecast?

It highlights key trends for battery energy storage supply chains and provides a 10-year demand, supply and market value forecast for battery energy storage systems, individual battery cells and battery cell subcomponents (including cathode, anode, electrolyte and separators).

How did energy storage grow in 2022 & 2023?

The US utility-scale storage sector saw tremendous growth over 2022 and 2023. The volume of energy storage installations in the United States in 2022 totaled 11,976 megawatt hours (MWh)—a figure surpassed in the first three quarters of 2023 when installations hit 13,518 MWh by cumulative volume.

What technologies are used in energy storage systems?

TECHNOLOGY RISKS: While lithium-ion batteries remain the most widespread technology used in energy storage systems, these systems also use hydrogen, compressed air, and other battery technologies. The storage industry is also exploring new technologies capable of providing longer-duration storage to meet different market needs.

What is the future of energy storage?

The United States energy storage market share of assets exceeding 100 MWh is poised to rise fastest at a projected 36% CAGR. Falling cell prices and enhanced revenue stacking make gigawatt-hour-scale parks such as Moss Landing economically attractive. Capital-light software optimizes charge cycles to shield warranties.

What does reg-132569-17 mean for energy storage?

ITC PROPOSED REGULATIONS (REG-132569-17): The guidance retains the Code's broad approach to defining new ITC-eligible energy storage property but also includes a nonexclusive list of qualifying technologies. The guidance confirms that a separate PTC-generating project may be co-located with a separate ITC-eligible project.
