

Energy storage projects under construction in Albania

Overview

What are the opportunities for solar energy deployment in Albania?

Opportunities for the deployment of solar energy are extensive. Albania's solar insolation is very high throughout most of its territory at more than 1 500 kWh/m² annually, with peaks of 1 753 kWh/m² annually, particularly in the western part of the country.

How much electricity does a solar park generate in Albania?

The solar park just north of the port city of Durrës will generate electricity equivalent to the annual needs of 150,000 inhabitants. The two projects won 15-year contracts for difference (CfDs) at the first successful solar power auctions in Albania. Spitalla, of 100 MW in peak capacity, gets EUR 29.89 per MWh for electricity delivered from 70 MW.

Will Albania build its first lithium ion battery plant?

Chief Executive Officer Bruno Papaj said the firm signed a memorandum of understanding with an Indian investor on the construction of Albania's first lithium ion battery plant. The facility is planned to come online within two years, with 100 MW in annual capacity.

Does Albania have a hydropower plant?

Hydropower makes up almost the entire domestic output in Albania, which helps balancing to a point, but it has no pumped storage hydropower plants. Furthermore, the country is exposed to drought and often turns to emergency imports.
