### **Overview**

What is an energy storage system?

An energy storage system (ESS) for electricity generation uses electricity (or some other energy source, such as solar-thermal energy) to charge an energy storage system or device, which is discharged to supply (generate) electricity when needed at desired levels and quality. ESSs provide a variety of services to support electric power grids.

What are energy storage solutions for electricity generation?

Energy storage solutions for electricity generation include pumped-hydro storage, batteries, flywheels, compressed-air energy storage, hydrogen storage and thermal energy storage components. The ability to store energy can facilitate the integration of clean energy and renewable energy into power grids and real-world, everyday use.

What are energy storage systems (ESS)?

Energy storage systems (ESS) have become essential components of modern power grids, providing solutions to a wide range of issues associated with the increased integration of renewable energy sources and the complexity of electrical networks.

Why should you choose Eaton energy storage systems?

Take control of your energy supply, cut your energy bills and simplify your shift toward a more sustainable future. Eaton energy storage systems enable communities and businesses to access a safe, reliable and efficient solution to support the electrification of transportation.

What is a battery energy storage system?

A battery energy storage system (BESS) is an electrochemical storage system that allows electricity to be stored as chemical energy and released when it is needed. Common types include lead-acid and lithium-ion batteries, while

newer technologies include solid-state or flow batteries.

What types of energy storage systems support electric grids?

Electrical energy storage systems (ESS) commonly support electric grids. Types of energy storage systems include: Pumped hydro storage, also known as pumped-storage hydropower, can be compared to a giant battery consisting of two water reservoirs of differing elevations.
