

# **Estonia s Energy Storage Implementation Plan**

#### **Overview**

What is the Estonian energy sector development plan?

The Estonian Energy Sector Development Plan aims to ensure that energy supply remains affordable and accessible to consumers, that environmental impacts are acceptable and that it aligns with the long-term energy and climate policies of the European Union.

How can we ensure the security of electricity supply in Estonia?

be covered using stored energy. To ensure the security of supply of electricity in Estonia, it will be possible in future to use a combination of renewable energy generation equipment and storage solutions (including seasonal storage), capture, storage and sequestration and new gen.

What policy measures does Estonia follow?

mate and energy policy measures. In domestic (environmental, climate and energy) activities, Estonia follows the EU's environmental, climate and energy policy and the related legal framework. National sectoral targets and national measures for achieving these are determined during preparation o.

What is the energy saving goal for Estonia?

ption must remain at 32-33 TWh:Estonia's economy is growing, so significant measures are needed to ke p consumption at the same level. The general energy saving objective of 14.7 TWh for the period 2020-2030 applicable under Directive 2012/27/EU (the Energy Efficiency Directive) will help keep final ener.

What is Estonia's energy support scheme?

ted to be made by the Riigikogu. The Estonian support scheme was amended in June 2018 when the current direct support was replaced by a scheme based on reverse auction. The state has established 17.6% as the target for 2020 in the Electricity Market Act and the 'National Renewable En.

How can Estonia improve domestic production capacity?

ve domestic production capacity. Estonia also plans to start organising technology-specific reverse auctions for bringing electricity from re ewable energy sources to market. This would make it possible to organise reverse auctions for bringing controllable production equipment to market, i\_koostamise\_juhend\_nov\_2017.pdfto the sta

### **Estonia s Energy Storage Implementation Plan**

## Estonia moves forward with a groundbreaking energy storage ...

The EUR100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery storage complexes with a combined capacity of 200 MW and a total storage capacity of 400 ...
