

Estonian container power generation

Overview

In August 2022, Eesti Energia announced the start of development for Estonia's first pumped-storage hydroelectric power plant (PSH). The project is located in the Estonia Mine industrial area in Ida-Virumaa and aims to become operational by 2026. Overview Energy in Estonia has heavily depended on . and Estonia are two of the last countries in the world.

The National Energy and Climate Plan published in 2019 aims to reduce greenhouse gas emissions by 70% by 2030 and by 80% by 2050. Renewable energy must be at least 42%, with a target of 16 TWh in 2030. .

Amidst geopolitical tensions, Estonia took decisive action to reduce its reliance on Russian energy sources, particularly in response to Russia's invasion of Ukraine. Previously heavily dependent on Russian imports for.

According to the (IRENA), in 2020, renewable energy accounted for 32% of Estonia's Total Energy Supply (TES). The composition of this renewable energy mix was heavil.
